

Instructions for adding crystal to your acid neutralizer

1. turn inlet and outlet valves off
2. open drain to relieve tank pressure
3. open tank cap & drain approximately 4 gal. of water from tank - then close valve
4. add crystal and fill to full line on tank
if no fill line sticker or mark on tank
- fill crystal 15" from top of tank
5. open inlet valve and fill tank full with water
6. close inlet valve when tank is full
7. replace tank cap
8. Open inlet and outlet valves

WARNING - If crystal level is below add line, or more than 21" from the top - do not add more than ½ bag at a time - after 2 weeks add additional crystal - add only ½ bag at a time.
